# Welcome

I'm Soliman Shebani. First, I'd like to thank you for downloading the Web Hosting Guide eBook. You've made the right decision.

The purpose of this guide is to make the task of choosing a web host much simpler and easier for you. It will also help clarify some of the ambiguous webhosting terms and expressions, answer some of your questions, and help you choose a suitable web hosting company.

By the time you finish reading the guide, you will have a better idea about which hosting company would suit your business.

If you have any questions that aren't answered in this guide, please don't hesitate to contact me at [soliman@shebani.com](mailto:soliman@shebani.com)

Chapter 10 - Summary and Conclusion

# Chapter 1 – Introduction

One of the most important decisions you need to make when you want to put your website online is to choose the right web hosting plan for your business or personal site/ blog. Due to the large number of hosting options and pricing plans, choosing the right one can be a time-consuming and confusing task.

The purpose of this eBook is to make this task much simpler for you. It will also help clarify some of the ambiguous webhosting terms and expressions, answer some of your questions, and help you choose a suitable web hosting company.

## **What is web hosting?**

Web hosting is a service that provides space on the Internet for users to store their websites. It is like renting an apartment in a complex except that in this case you fill the apartment with php and html files, images, videos and codes for your website.

The computer that stores websites is called a “server”. It is designed to process requests and deliver data and information to another computer over the internet or a local network. There are several types of servers including web servers, mail servers, and ftp servers.

Web hosting companies rent their clients a space on their server for a monthly fee. When you sign up with a hosting service, they will provide you with a control panel to manage your website. This allows you to upload your website files and database, create emails and get support from them.

Choosing the perfect web host for your Website or blog is not as difficult as it might seem.

Whether you are an experienced webmaster who is planning to switch webhosts, or a complete novice looking for the best hosting service, you can find a hosting plan for your site based on your most wanted features.

In the next chapter we will define and discuss some important web hosting terms and expression that will make the choice of web hosting easy.

# Chapter 2

## Types of Web Hosting Services

There are many types of web hosting services. Here is a short description of each.

### 1- Shared Hosting

One of the most common packages that many small businesses and individual marketers use is shared web hosting. As the name implies, shared web hosting is when your website server is shared with many other websites. This means that your website sits along with other websites on the same servers, sharing resources such as the memory and CPU. Shared hosting is the cheapest and smartest option for smaller or start-up businesses.

Skip this chapter if you are an experienced web master  
or you know all the types of web hosting services

[Go to next Chapter](#)

### 2- Reseller Hosting

Reseller hosting is a type of shared hosting where you can host multiple websites under one account and share the allocated resources between them. It is suitable for internet marketers who own many websites or web designers who provide hosting services for their clients.

You can use reseller hosting to host your own websites, or start your own hosting company selling hosting services by designing your own hosting plans prices and billing your customers under your own brand.

The hosting company will provide you a with certain amount of disk space and bandwidth just like regular web hosting. However, what makes reseller hosting different from regular shared hosting is that you will also receive a reseller control panel that allows you to create your own web hosting accounts and share your allocated server.

The hosting provider is still in control of their server and is responsible for updating server software and maintaining the server. The server resources are still shared between clients, but generally, the reseller hosting accounts come with larger disk space and more bandwidth.

### **3- WordPress Hosting**

WordPress is also a type of shared hosting where servers are optimized differently. They also have features that are particularly attractive to WordPress performance such as faster load time, pre-installation and security features that work specifically with WordPress. This option is useful for businesses and site owners who don't have the time or knowledge to manage their WordPress sites.

### **4- Dedicated Hosting**

A dedicated server is a physical server that you can purchase or rent entirely for your own use. Dedicated servers are more expensive than VPS and are generally used by high traffic websites or large businesses and government organizations that require high levels of data security.

In dedicated hosting, the hosting company rents you a complete server, and lets you take full control over it. This means that you have full administrative access and can set things up the way you like. You are

responsible for installing your own software and applications. Note that the administration of dedicated servers requires specific technical skills. If you don't have this skill or can't afford a professional to manage your websites, stick with VPS or shared hosting.

## **5- VPS Hosting**

VPS is an abbreviation for Virtual Private Server. VPS allows you to create your own virtual server within a dedicated server, so you don't share the resources such as memory, storage, and processing power with anyone else. VPS is a safer, faster, more secure, and more reliable option. It keeps your web site separate from the others while still maintaining affordability.

VPS is somewhere between shared and dedicated plans. If dedicated hosting is an expensive option for medium-sized and fast-growing companies, and shared hosting is not adequate, then VPS can be the optimum choice.

## **6- Cloud Hosting**

Cloud Hosting is a web hosting service in which several dedicated or VPS servers are connected together to form a cloud-like setup. There is no hardware to purchase or rent. It is a self-service hosting, billed hourly or monthly, and controlled via web servers or API interface.

Cloud Hosting is considered one of the most reliable web hosting setups because if one or more servers on a cloud fail, the remaining servers can take over and continue providing hosting to all the websites hosted on that cloud without any interruption in the service.

Cloud hosting can be a cost-effective option for new businesses but not for those who invested in infrastructure and software of a dedicated server.

## **7- Managed Hosting**

Managed hosting, as the name applies, is a hosting plan where everything is completely controlled by the hosting company. The operating system, control panel, server setup and any pre-installed applications are all taken care of. The hosting company also provides support for every problem, task, emergency or routine. Managed hosting usually comes with automated backup and monitoring.

Managed hosting requires far less work than unmanaged hosting and requires little expertise. If something goes wrong and you're stuck, you can contact your hosting support and they will take care of the issue. These services, however, come at a higher cost.

## **8- Unmanaged Hosting**

Unmanaged hosting is the most popular type of hosting. In this kind of hosting, you are the owner or the admin of the website or blog, and are responsible for controlling all aspects of the website, including installation, uploading, adding email accounts and managing security and backups. The hosting company provides you with a control panel (cPanel for Linux and Plex for Windows) which allows you to do all of the above and any other website management tasks. Doing this requires the knowledge of using cPanel, which is used by most hosting companies. Unmanaged hosting is suitable for experienced admins and webmasters. However, if you are new and willing to learn, most hosting companies provide tutorials to help control your website in addition to email or chat support. You can also find many helpful videos on Youtube.com to help you manage your hosting. One of the advantages of unmanaged services is that they are significantly cheaper than managed ones.

## Chapter 3

### How to Choose a Web Host

Now that you know more about the different types of hosting options and have a better idea about the type of hosting you need, let's look more closely at some points you need to consider before going for a specific web host. Understanding these points will help you make a better decision in choosing the right web hosting plan for your website.

Here are some guidelines that can help you choose the best hosting for your website or blog.

Skip this chapter if you know how to choose a web host.  
[Go to next chapter.](#)

## **1- Price**

The monthly hosting fee you will be paying to the hosting company shouldn't be your first concern unless you are an individual or a small company putting your website online for the first time. But for an established business, we recommend focusing on the above points before looking at the price. Of course, going beyond your budget is never wise, however, choosing a web host on the basis of price alone is also not a good idea. So, do not go for the cheapest web hosting plan unless most of the features mentioned above are fulfilled.

The best hosting providers offer plans for every budget and, in most cases, signing up for more than one year will qualify you for extra discounts.

You should also note that most web hosting companies have higher renewal fees compared to the original price you signed up for. So, it is highly recommended to check hosting renewal prices before signing up. However, there are a few companies that have fixed renewal prices.

## **2- Bandwidth and Storage**

When hosting websites, you don't want to have any sort of limitations. Ideally you should have unlimited storage and bandwidth, so you can upload as much content as you want (images, content, videos etc.).

However, only a few hosting companies offer full unlimited bandwidth and storage especially with SSD drives.

Even those who claim to provide unlimited bandwidth and storage can warn you that you are using too much bandwidth, or worse, ban you altogether. Storage and bandwidth shouldn't be an issue for small businesses and blogs as long as they don't have too many multimedia files. Most reliable hosting companies give at least 10GB storage and a

reasonable bandwidth enough for beginners and a small business website.

### **3- Free Migration services**

If you are planning to change your current web host to a different provider, one of the features to look for in the new web hosting provider is free migration or free site transfer.

This free service can save a great deal of time and hassle, especially if you are using a content management system such as WordPress or you have many email accounts. Instead of moving your website yourself, the new host will take care of it. You'll only need to provide them with your cPanel or Plex login details.

Most web hosts provide this service for free. Only a few hosts charge a fee for this service.

### **4- Location**

The location and the number of web hosting servers can have a significant effect on the loading speed of a website. Generally, the more servers available, the faster the service. So, when searching for a web host look for web hosts with multiple servers and locations then choose the server closest to your customers.

### **5- Uptime and Loading Time**

Most of the web hosting providers claim an uptime of at least 99%. Although it is difficult to measure the uptime exactly, you have to take their word for it. What is most important is the loading time. Many hosting companies started using SSD drives in their servers, which improves loading time considerably. However, there are still some major companies that use old HD storage technology. My recommendation is to choose a hosting company that specifically states they use SSD drives

## **6- Security**

Security plays a crucial role when it comes to selecting a web important files hosting company. The minimum security that is expected for a web host is SSL security which protects visitor critical information using https protocol. Most hosting companies now provide “Let’s Encrypt” free SSL with their plans. However, if you have an e-commerce website you need to consider using another layer of security by purchasing an advanced SSL certificate.

Having an SSL certificates is a must, but not enough. You should also think about other security issues such as malware scanning and hacking prevention.

## **7- Refund policy**

If you are new in the business and not sure whether your selected web hosting company will suit your needs, then you should only purchase a web hosting plan from a company with a refund policy. This will allow you to get your money back if you do not like their services or face any problems with their support.

Most web hosting companies offer at least 30 days no questions money back guarantee. Others offer 45 days or more. For example, [FastComet](#) offers 45 days, while [DreamHost](#) offers 97 days,. [A2hosting](#) offers a prorated refund any time after the first 30 days trial period. Signing up with a hosting company that provides a longer refund policy is a smart choice idea, especially if you are moving from one host to another.

## **8- Back-Up**

Make sure that the web hosting company that you choose offers some type of backup, either free or a paid backup option. This feature is very

important as it comes handy when you want to restore your web content in case of a disaster or server problem. Additionally, it is recommended to use a remote storage location for your website such as Dropbox, Google Drive, Amazon S3, or sign up with an online services such as [blogvault](#), [MyrePono](#), or [UpdDraft](#). Subsequently, you should make your own manual backups on a regular basis for at least databases and important files.

## **9- Customer support**

Customer support plays an important role when it comes to choosing a web host. Many web site owners are more concerned about price and main features of web hosting companies and neglect to check their customer support service. It is important to go with a web hosting company that offers excellent customer support as well as 365/24/7 live chat to their customers. No one wants to wait to hear from support when his/her website is down.

Among the web hosts we reviewed, two of them stand out in terms of customer support. They are [SiteGround](#) and [GreenGeeks](#)

## **Conclusion**

The features mentioned in this guide are the most important aspects of web hosting. You need to consider these before signing up for a new web hosting service. The most important ones are: customer support with live chat, backup and security, free migration and SSD storage.

In the next chapter, we will review some of the best web hosting services that provide most of the above features.

# Chapter 4

## Reviews of the Most Popular Web hosts

This chapter contains reviews of most popular web hosting services, their prices, features, and other information. The prices range from \$1.00/Month to more than \$10/Month. The following Web hosting companies are included. You can read the review about a particular company by clicking on its link.

We have categorised the companies as follows:

Click on any link to read detailed review

### **Affordable web Hosting** ( \$1.00/Mo - \$2.99)

[TMD Hosting](#)

# A2 Hosting

[A2 hosting](#) is one of the oldest web hosting companies. It was founded in 2001 in Ann Arbor, Michigan and then re-branded in the year 2003 as A2 hosting.

Their data centers are located in Michigan and Arizona in USA and Amsterdam, Singapore in Europe and Asia respectively.

Many people don't know that A2 Hosting was the first web hosting company who started offering PHP7 for scripting and took the web hosting business to a whole new level. But this information is not enough to give you a reason to select A2 Hosting as your new platform to host your business or personal website.

Let's take a detailed look at A2 Hosting including their plans, price, security level, customer support, features and why this company is better than many other web hosting companies.

Web hosting plans and price:

[A2 hosting](#) offers four different types of hosting solutions which include; shared, reseller, VPS and dedicated. Each of them has at least 3 different hosting plans with different prices. But generally, their prices start from \$3.92 per month. For instance, here are the pricing of the plans for different web hosting categories:

- **Shared Hosting:** \$3.92 per month to \$9.31 per month
- **Reseller Hosting:** \$13.19 per month to \$40.91 per month
- **VPS Hosting:** \$5.00 per month to \$32.99 per month
- **Dedicated Hosting:** \$99.59 per month to \$141.09 per month

SHARED HOSTING	RESELLER HOSTING	VPS HOSTING	DEDICATED HOSTING
Starting at <b>\$ 3.92</b> monthly <small>was \$7.99</small>	Starting at <b>\$ 13.19</b> monthly <small>was \$19.99</small>	Starting at <b>\$ 5.00</b> monthly	Starting at <b>\$ 99.59</b> monthly <small>was \$119.99</small>

COMPARE PLANS	COMPARE PLANS	COMPARE PLANS	COMPARE PLANS

## Security Features

[A2 hosting](#) provides three different security features which include SSL certificates which are totally free. This security feature keeps the site visitors secure. The other security features which A2 hosting offer are called KernelCare and HackScan. The KernelCare is designed for the Linux where HackScan is a free malware protection service. You can also use CloudFlare and other security solutions to avoid DDoS attacks.

## A2 hosting Speed:

[A2 hosting](#) knows the importance of the high speed in terms of SEO, visitor satisfaction, and bounce rate. That's why they provide a fast speed web hosting solution. In order to give you extra control on your website speed, they also offer Turbo server solution which will make it 20 times faster. The price of Turbo is different on different hosting plans (starting from \$9.31 per month).

## A2 Hosting Features

- Free SSL Certificates

- Free Site Transfer
- Free SSD Servers
- Free SSH
- Up To 20X Faster Servers
- Global Servers
- PHP 7
- cPanel Control Panel
- 99.9% Uptime Commitment
- All hosting plans of A2 web hosting support OpenCart, WordPress, Drupal, and Joomla.
- 24/7/365 customer support
- Any Time Refund

Backup options:

[A2 hosting](#) creates daily backup for the websites hosted with them. backups can be downloaded and later restored using ftp or file manager. The company also provides external backup option through **dropmysite.com** at an extra charge depending on the size of the website.

Refund Policy

[A2 hosting](#) offers any time prorated refund after the 30-day trial period. You always have the option to get your whole money back if you are not satisfied with the services. This is a big plus for A2 hosting because all other hosting providers do not offer any refunds after their trial period. Please note that this refund is only given to new users.

**Pros:**

- Fastest web hosting plans
- Reliable and stable uptime
- Multiple free security solutions
- Any time money back guarantee

- Free content delivery network
- Free web site transfer (website site migration)

### Cons:

- Some features are restricted on cheaper plans
- Does not offer Free Domain

### A2 Hosting Review Summary:

[A2 hosting](#) is known to be a fast loading, great up time, superior customer support hosting company. All plans come with Free SSL security making it one of the best choices for personal blogs and small to medium business websites. A2 hosting is the only hosting company that provides **any time money back guarantee** allowing you to get part of your money back after the 30 days free trial period.

# FAST COMET

[Fast Comet](#) started their web hosting business in 2013. It is among the few web hosting companies who have managed to run their business for many years with few customer complaints. That's why its number of

customers has reached millions. Their head office and data centers are located in San Francisco, California, London, Frankfurt, Amsterdam, Singapore, Tokyo, and Bulgaria. Some of the world's most popular websites are hosted on their servers. However, there is some initial information which one needs to be aware of before paying for the web hosting. This helps one understand whether one should

rely on the specific web hosting company or not. For this reason, I am sharing a detailed review below and discussing some important aspects.

## Prices and Plans:

[Fast Comet](#) offers many different hosting plans including shared hosting, Cloud Hosting, and Dedicated server. They also have separate hosting plans for individuals CMS including WordPress, Joomla, OpenCart and Social Engine hosting.

- **Shared Hosting:** Starting from \$3.95 per month
- **Cloud Hosting:** Starting from \$59.95 per
- **Dedicated Server:** Starting from \$139 per month

The price of the cheapest shared hosting plan is **only \$3.95 per month** and includes all the features needed to run your business online. The difference between the 3 plans is the number of sites you can host in, the storage space and the number of monthly unique

visits. Other than that, every plan has the same features including, Free SSL Daily backups and fast SSD Drives.

**Shared Cloud SSD Hosting Powered by cPanel**

## Main Features

- Free Domain forever
- Free SSL Certificates
- Free Daily Backups
- Free Website Transfer
- 24/7 Priority Support
- SSD-Only Cloud
- Cloud flare CDN

- cPanel Powered Hosting
- 45 Days Money back

### **Back-up:**

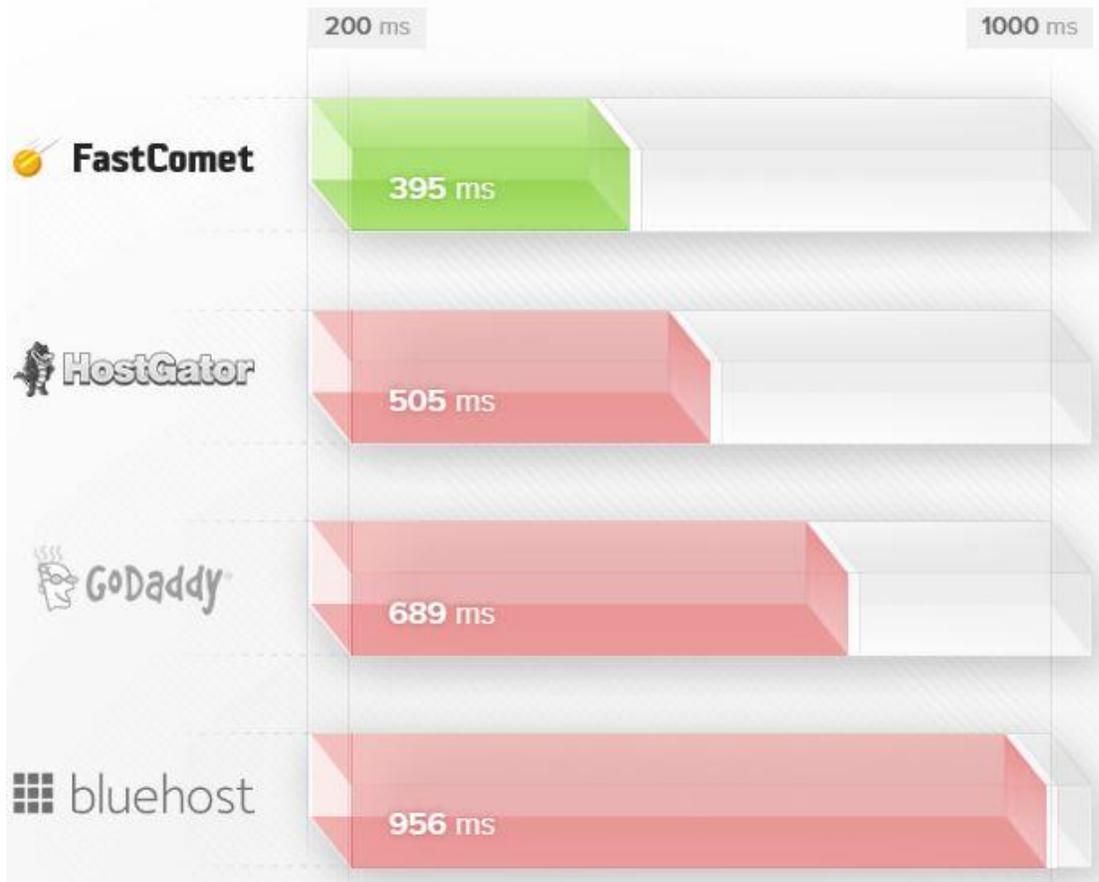

Backup is important for the website owner. For this reason, the company Fast Comet offers two types of backup options; daily and weekly. They also keep every back-up for 30 days. This means that you can request the backup from the company any time.

### **Security:**

Free Let's Encrypt SSL is included in every hosting plan they offer. They also do the anti-theft security evaluation on regular basis. All their data centers are protected by the physical security system. For dedicated and cloud hosting, they offer paid security options.

### **Fast Comet speed:**

[Fast Comet](#) has a fast loading time. It has been reported that it is faster than some major web hosting companies such as Bluehost, GoDaddy and HostGator. The figure below shows the loading speed of fast comet compared to those three.

### **FastComet Refund Policy**

After your first purchase, you have an option for 45 days to cancel your hosting plans and get your entire funds back. They do not charge any cancellation fees.

### **Fast Comet Pros:**

- The interface is easy to use
- All hosting plans have great features
- Excellent loading time
- Cheap and low renewal prices
- Daily and weekly backup
- Unlimited MYSQL, and emails.

## Fast Comet Cons:

- Limited SSD storage all Plans (between 15GB to 35GB)
- No Reseller Hosting Plans

## Summary

[Fast Comet](#) is a premium web hosting companies but it is not very popular among the major web hosting companies. Their plans come with some features that other web hosts charge money for. Prices start at only **\$3.95/month**, and with this price you get so many features, including Free SSL security, Daily backups, SSD Drives speed, Free SDN, Free Domain forever and many more.

[Fast Comet](#) will be an attractive option for customers at all levels of business. **Higly recommended**

For more information please [visit Fast comet website.](#)

## Site Ground

[SiteGround](#) is one of the most highly rated hosting companies. Founded in 2004 in Bulgaria. It has offices in Spain, UK and USA. Their servers are located in the US and they offer really good site loading time and superior customer support. It is one of those hosting companies recommended by WordPress. The following review of SiteGround will help you decide if it fits your needs or not.

### Plans and Prices

[SiteGround](#) offers all types of hosting including shared hosting, WordPress hosting, cloud hosting, and dedicated hosting plans. Their hosting features include free Let's Encrypt SSLs, free Auto Daily Backups, free cPanel & SSH Access, free setup & site transfer, free SSD servers free Cloudflare CDN, excellent loading time and superior Customer Support. In short, it has all the features of a good hosting company.

### Hosting plans

- Web Hosting: Starting from \$3.95 per month to \$11.95 per month
- Cloud Hosting: Starting from \$80 per month to \$240 per month
- Premium Hosting: Starting from \$269 per month to \$729 per month
- Reseller Hosting: Starting at \$42 per month

The most popular plan is the shared hosting and it includes 3 plans as follows:

**The Startup Plan** – The Start-up plan is perfect for people with one website that are starting now.

**The GrowBig plan-** A great value for money offer, including the option for multiple websites and the SuperCacher that greatly improves a WordPress and Joomla website speed.

**The GoGeek plan** – Perfect for people with e-commerce and larger.

**Web Hosting Crafted For Superior Experience**

Plan Name	Icon	Tagline	Discounted Price	Features
StartUp	Home icon	Crafted for a Great Web Start	60% OFF THE REGULAR \$9.95/MO. <b>\$3.95/mo.</b>	<ul style="list-style-type: none"><li>One Website</li><li>10GB Web Space</li><li>Suitable for ~ 10,000 Visits Monthly</li><li>All Essential Features</li></ul>
GrowBig	Star icon	Crafted for Your Web Growth	60% OFF THE REGULAR \$14.95/MO. <b>\$5.95/mo.</b>	<ul style="list-style-type: none"><li>Multiple Websites</li><li>20GB Web Space</li><li>Suitable for ~ 25,000 Visits Monthly</li><li>All Essential Features</li><li>Premium Features</li></ul>
GoGeek	Crown icon	Crafted for Real Web Geeks	60% OFF THE REGULAR \$29.95/MO. <b>\$11.95/mo.</b>	<ul style="list-style-type: none"><li>Multiple Websites</li><li>30GB Web Space</li><li>Suitable for ~ 100,000 Visits Monthly</li><li>All Essential Features</li><li>Premium Features</li><li>Geeky Advanced Features</li></ul>

## Features

- Free Let's Encrypt SSLs
- Free Auto Daily Backups
- Free cPanel & SSH Access
- Free Setup & Site Transfer
- Free SSD Servers
- Free Cloudflare CDN
- Superior customer support
- HTTP/2 Enabled Servers
- Unlimited Email Accounts
- 30 Days Money Back

## Backup:

One of the main attractions which makes many people choose hosting from Site Ground is the daily free backup option on all of their hosting plans. There are very few companies out there who offer daily basis backup options to the customer. This option is available on all sites and complete data of the customers.

## Uptime:

99.9% uptime has been advertised and claimed by the most of the web hosting companies but there are very few companies who actually prove this. [Site Ground](#) is one of them.

## Pros:

- WordPress has recommended this company
- Excellent customer and tech support 24/7
- Daily free back option for everyone
- Excellent for hosting WordPress websites
- Easy to integrate E-commerce CMS.

## Cons:

The only drawback of [SiteGround](#) is their limited disk space. They only offer 10 GB space in their startup plan, 20GB for the rowoBig, and 30 GB for the GoGeek plan. Usually these numbers are enough for most websites. But if your website includes lots of videos, we recommend using another hosting company with unlimited disk space, such as A2hosting or InMotion Hosting.

## Site Ground Review Summary

[SiteGround](#) is one of the best hosting providers that are recommended by many users on different blogs and forums. It is also officially recommended by WordPress.org. One Of their unique features is that they charge the same monthly price for Managed WordPress hosting as other shared hosting services.

Visit [SiteGround Website](#) for more detailed information.

## Green Geeks

**Green Geeks** was launched in the year 2008. Their data centers are located in Canada, USA, and Amsterdam. The company has been founded by Trey Gardner. In the past Trey worked with 8 different popular companies before starting his own web hosting company. His aim was to provide extraordinary web hosting services to the people all around

the world. It has been more than 10 years now and Green Geeks is still known as a reputed green web hosting company with excellent online reviews by thousands of satisfied customers.

### Price and Plans:

**Green Geeks** offer three different types of web hosting plans. Their hosting plans have been named as **Shared web hosting**, **WordPress hosting**, and **Reseller hosting**. No VPs or Dedicated Hosting. The hosting plan can be purchased for \$2.95 per month. Their WordPress Hosting is especially ideal for those who want to use WordPress for their website which could be even a business or e-commerce website.

## One Platform, Multiple Hosting Options

### WORDPRESS HOSTING

Speed, security and expert support for WordPress powered websites.

Starting from \$2.95/mo.

[SEE PLANS](#)

## Green Geek Important Features

For all plans they offer:

- Unlimited SSD Storage and Bandwidth
- Free Website Migration
- Free Domain Name Registration or Transfer
- Free Website Builder and Templates
- Free SSL Security Certificates
- **SECURE** IMAP/POP3 E-mail Accounts
- **24/7/365** Expert Tech Support
- **99.9%** Service Uptime

## WordPress Hosting

You can easily notice that **Green Geeks** don't charge extra for WordPress hosting like some other companies. There is no hidden fee included in these prices and these are the final prices set by the company. The features of shared hosting and WordPress hosting are almost the same except that WordPress hosting is offered from better servers for fast loading.

# WordPress Ready Web Hosting

[GET STARTED NOW →](#)

## Green Geek Unique Features

- Unlimited disk Storage and bandwidth
- SSD-based RAID-10 Storage Arrays
- HTTP/2 & PHP 7
- Power Cacher
- 300% Offset with Renewable Energy
- Free CDN Integration
- Enhanced SPAM Protection

## Backup and Security

For better security of their customer's websites, Green Geeks perform automatic nightly backups and offer **free SSL certificate** with every plan. They also provide Enhanced SPAM Protection. The company has the physical security system and virtual security system to ensure that the websites of their customers are always safe from hackers and computer viruses.

## Refund policy

Like other popular web hosting companies, Green Geeks offers 30 days money back guarantee. This is a 100% refund policy which means that you will get your whole funds back if you don't like their services within the first 30 days of your purchase.

### Pros:

- Unlimited web hosting, database, and traffic
- Powered by renewable energy
- Free backup, domain, and SSL included
- WordPress integration is very easy and fast
- Excellent Customer Support

### Cons:

- No VPS or Dedicated Hosting

## Conclusion

After reviewing Green Geeks, we can confidently state that it is the No. 1 Eco Friendly web hosting provider in the world. It comes with all the features of a reliable hosting provider including Ultra-optimized web & database servers allowing for blazing fast data serving pages up to 50 times faster.

**Green Geeks** is **highly recommended** by thousands of users.

For more information [visit green geeks website](#).

# InMotion Hosting

**InMotion Hosting** is one of the few web hosting companies who started their business in early 2001 when there were very limited websites. It is a privately-owned web hosting provider, with a customer base of over 300,000 domains. Their initial servers were located in Virginia Beach, USA but today they have two data centers which are located in the United States of America.

**InMotion Hosting** is considered one of the top-rated web hosting companies by CNET for 15 years and holds the highest A+ rating by BBB (Better Business Bureau). One who wants to use Inmotion Hosting solution for his/her business must want to know about the detailed information about this company. To help you decide if Inmotion hosting is good for you, I am writing a review about it in which I will also discuss the important things like features, price, plans, customer support, backup options, security level, etc.

## Plans and price:

Hosting offers five different types of hosting solutions; Business, VPS, Dedicated, Reseller and WordPress hosting. All of them have different hosting plans. The lowest plan starts from \$4.99 per month.

Their Plans include unlimited disk space, unlimited, bandwidth, unlimited emails, as well as free SSL, Hack Protection, Free Automatic Backups and free website migration. They use fast SSD servers, with great up time, and they provide DDoS Protection.

- **Business Hosting:** \$5.99 per month
- **VPS Hosting:** \$19.99 per month
- **Dedicated Servers:** \$99.99 per month

- **Reseller Hosting:** \$13.99 per month
- **WordPress Hosting:** \$6.99 per month

#1 in Transfers                      #1 Support Team                      #1 Industry Guarantee

Please note that the above prices may change at any time. Please visit [InMotion Hosting](#) for current prices.

### InMotion Unique features

- Free SSD drivers included in all hosting plans
- Secure IMAP Email, SSH Access, and Max Speed Zone™
- An advanced control panel (cPanel)
- 20X faster than traditional HDDs
- Multiple security solutions like Let's Encrypt and Comodo.
- Free website migration from other hosting servers.

### Security Features

There are several security features offered by the Inmotion hosting including free SSL certificates. Optional SSL certificates are also available for email accounts. Other security features include; McAfee, free Security plug-in for WordPress, Security Suite and Secure IMAP Email etc.

## Backup options

You don't need to pay extra to create a daily backup of your websites. Even in the basic web hosting plans, the free data backup options are included but this comes with some limits. You can always upgrade this to advance backup options as well as in the future.

## InMotion Hosting Speed

**InMotion Hosting** uses MaxSpeed Zone Technology which is unique and offered by very limited web hosting companies. This technology allows the visitor to connect with the nearest data center which will automatically load the website faster. Other than this, overall loading time on Inmotion web hosting servers are quite fast. This has been possible due to the quality of the server they have loaded in their data centers which are located in the United States of America.

### Pros:

- Fast Secure servers using MaxSpeed Zone Technology
- Free SSL Security
- Free Daily Backups
- Superb Customer Support
- Free Website Migration
- 90 Days Money back guarantee

### Cons:

- Servers are located in the United States of America only
- Their shared hosting plans are a little expensive compared to similar web hosts such as [A2hosting](#) and [Site Ground](#).

## Refund Policy

Unlike other web hosting companies, InMotion Hosting doesn't only offer 30 days money back guarantee but **90 days money back guarantee**. There are very few hosting companies who offer 3-month

refund policy to their new users. This offer does not apply to the domain registration.

### **InMotion Review Summary:**

**InMotion Hosting** is one of the most trusted companies in web hosting services. They offer several plans, including Shared, VPS, Dedicated, Reseller and WordPress hosting. But they are more geared to business other than personal websites. This explains why their shared hosting prices are above the average.

For more details please [visit InMotion Hosting Official website.](#)

### **Shared cPanel Hosting with Free SSD**

InMotion Hosting provides fast Shared cPanel Hosting plans for easy server management.

# Host4geeks

[Host4geeks](#) LLC is a premium web hosting service that aims at providing faster loading and responsive website hosting for marketers,

business owners and bloggers. With over 4 global data centers, of which 2 are in the US, one in the UK and one in India, Host4geeks provide optimal service for people that are looking for cheap hosting on a tight budget.

Host4geek provides different services on their web hosting site that includes Shared Hostings, cPanel Reseller hosting and Managed VPS. They provide 4 globally different data center locations for your hosting servers, which is a plus as it provides lower ping and high connection rates as it connects you to the nearest possible server location.

	 STARTER	 BUSINESS
	\$ 2.49 PER MONTH	\$ 9.49 PER MONTH
<b>PRIME FEATURES</b>

<b>TECHNICAL DETAILS</b>				

[Host4geeks](#) Reseller hosting is considered one of the best for money. The cheapest plan comes with 50GB and you can host unlimited cPanel accounts. The price \$4.76/month for a 3 year contract, but you can pay monthly for only \$5.95/ Month which is still very cheap compared to other hosts who charge more than \$10/month for 10 accounts and with list storage space.

All [Host4geeks](#) reseller plans include free DDoS Protection, Free SSL Certificates, Free Website migration, Free Daily Malware Scans and

24×7 server and network monitoring by host4geeks Security Operations Center

If you have more the one website, or you are a website developer, you can save a lot of money by using [Host4geeks](#) Re seller hosting.

### **Customer Support**

[Host4geeks](#) customer service supports several different ways in which you can contact them including phone number, Skype, and email support. There are different categories in their support section, which includes Sales, Billing, and Support. You can choose either of them based on whether you're a new customer who's willing to try out their hosting service or a user encountering a problem.

### **Summary**

[Host4geeks](#) is powered by the latest SSD drives along with enterprise grade branded hardware. All hosting plans come with automated malware detection, free SSL Certificates, and true 24×7 support.

In addition to shared, reseller and managed WordPress hosting, Host4geeks also offers **VPS and Dedicated Hosting**. For more information, please visit [Host4geeks](#) official site.

## Dream Host

Many people don't know that Dream Host started as an undergraduate student project in 1996 at Claremont College in California, making it one of the oldest hosting companies in the world.

[Dream Host](#) now claims that they have more than 400,000 happy customers and host more than 1.5 million websites on their servers.

I am sharing my review of Dream Host which will help you decide if you should purchase hosting from this company or not.

### Prices and Plans:

Whether you are looking for shared hosting, VPS hosting or dedicated hosting, Dream Host has the solution for everyone.

- **Shared Hosting:** Starting at \$2.95 per month
- **WordPress Hosting:** Starting at \$2.95 per month
- **VPS Hosting:** Starting at \$13.75 per month
- **Dedicated Hosting:** The basic plan starts at \$169 per month.

Annual Hosting
Monthly Hosting

-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## Dream Host Features

- **FREE Domain + Privacy**
- **WordPress managed Hosting**
- **Free Site Builder**
- **Free SSL Security**
- **Fast SSD Storage**
- **Unlimited Hosting**
- **Award Winning Support**
- **Free Advertising Credit**
- **Dream Host Control Panel**

- PHP 7.1 Support
- 97 Money Back Guarantee

**DreamHost** offers WordPress hosting plans and cloud hosting plans too. By offering so many options to the customers, the company makes it easy for the customer to select an ideal hosting plan as per their requirements.

### **Security:**

Dream Host has been running their business for 20 years successfully due to the security features their customers trust. Dream Host currently offers Free Self-signed Let's Encrypt SSL certificates to its customers. Advanced Business SSL can be purchased at \$15/year.

### **Unique Features:**

These are some pros of this awesome web hosting service:

- PCMag's "Editors' Choice" Winner 4 Years In a Row
- 97 day money back guarantee.
- \$100 Google Adwords.

### **Cons:**

- Daily Site Backups not available in their starter plan
- Website Migration costs \$99

### **Refund policy:**

**DreamHost** offers more than 3-month money back guarantee to their new customers. Their money back guaranteed time is 97 days. I don't know if we have any other company who offers that much time to enjoy the money back feature. This is 100% money back guaranteed policy with no hidden fees.

### **Dream Host Review Summary:**

**DreamHost** is one of the oldest reliable hosting companies. Their starter hosting plan is priced at \$2.95 per month where you can host one website in fast SSD drives with free SSL and unlimited traffic. This is a

great deal for small websites, and anyone who is looking for an affordable way to get online. Dream Host offers the longest money back guarantee (97-days), it is more than enough time to test drive their service before getting locked into a lengthy contract.

To learn more about Dream Host please [visit their official website](#).

## Blue Host

A blue rectangular graphic with white text. At the top, it says '\$3.95/mo.' in a large font. Below that, it says 'Quality Web Hosting' in a smaller font. Underneath, it says 'FREE Domain' in a bold font. At the bottom, there is the Bluehost logo, which consists of a 3x3 grid of squares followed by the word 'bluehost' in a lowercase sans-serif font.

Bluehost is one of the web hosting companies recommended by WordPress. It was founded by Matt Heaton and Danny Ashworth. BlueHost started selling their services in the year 2003. Today, they have more than 750 employees all around the world and are known as one of the best web hosting companies. The servers of the company are located in Utah, Provo. The

total area of their data center is more than 50,000 square feet.

The company started by selling very basic web hosting services but today they also offer dedicated hosting services. To know more about Blue Host, read my following review.

Bluehost provides three shared hosting options to choose from (Basic for \$3.95/month, Plus and Prime both are for \$5.95/month). You should note the advertised pricing for hosting in most web hosting companies including blue host is usually for a three-year contract. If you want a one year or two-year contract, then you should expect to pay more.

### **Price and Plans:**

The web hosting is the main attraction of Blue Host which makes the company popular but the company also offers other hosting services like VPS, Dedicated, Cloud and WordPress. All of them are divided into sub-hosting plans.

Below are the details regarding the Bluehost Prices and Plans:

- **Shared Web Hosting:** Starting from \$3.95
- **Cloud Hosting:** Starting from \$6.95
- **WordPress Hosting:** Starting from \$3.
- **Next-Gen VPS Hosting:** Starting from \$19.99

- **Dedicated Hosting:** Starting from \$79.99 to \$119.99 per month

## WordPress managed hosting

[Bluehost](#) supports WordPress websites too. They have special servers that are designed to run WordPress efficiently. The company boasts a technology that will offer reliability, performance, and functionality for WordPress websites.

## Website migration

Website migration is another important service offered by Bluehost. The company has a team of experts that assist their customers to migrate from one hosting company to Bluehost. All your data, emails, and sites will be completely moved to Bluehost without any loss.

## **Customer support**

Bluehost also offers an excellent customer support to its ever-growing list of customers. The company provides adequate customer support via telephone, email and tickets that ensures that you can get in touch with the company's Customer Support department whenever you have a complaint or inquiry.

## **Free domain name**

[Bluehost](#) also offers free domain names to new subscribers to any of its plans. This will reduce the expenses to whoever wants to engage their web hosting hiring services.

## **Blue Host Refund Policy**

The company offers 30 days money back guarantee. This option is only available for the new users. There is no hidden fee when you ask for the refund. The company has made the whole refunding process easy.

## **Security by BlueHost:**

Security of the data and information hosted on Bluehost is taken seriously by the company. There are different tools which BlueHost uses to protect their customer's data but among them, Apache Spam Assassin, Spam Hammer, and Spam Experts are the most powerful. The company offers e-commerce and WordPress hosting too which comes up with free SSL certificates. The free SSL certificates are also offered on their basic web hosting plans as well.

## **Backup options:**

[Bluehost](#) offer 100% free backup services on all of their hosting plans. They create the backup of their users' sites on a daily basis. There are some restrictions on the basic plans but still, this includes some amount of free backup for everyone. For dedicated hosting, they have specific rules for the backup but those advanced plans are also included in the free regular base backup options for all customers.

## Bluehost Uptime:

For more than 15 years BlueHost has offered their services successfully. The main reason behind their success is their server's uptime which is 99.9% and 100% mostly throughout the year. This also guarantees the good website loading speed.

### Pros:

- WordPress Hosting is the same price as shared hosting
- Fast Page Loading
- Good Security Options
- Many Integrations and Apps
- Free Advertising Money

### Cons:

- Site Migrations Aren't Free
- Their tech support is not as fast as some other hosts.
- Some hosting services are cheaper than Bluehost. such as Hostinger, iPage, and fastcomet.

## Conclusion

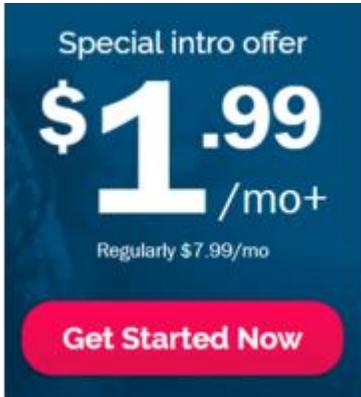

**Bluehost** is one of the popular old hosting companies and it is one of the web hosts recommended by WordPress . They offer a variety of hosting options at prices that start at \$3.95/month. By using BlueHost, it is easy to create attractive and stable web pages for your blog or business.

For more information visit [Blue Host Official Website](#)

A promotional banner for Bluehost. On the left is the Bluehost logo, which consists of a blue square with a white grid pattern and the word "bluehost" in white lowercase letters below it. To the right of the logo, the text "The Best Web Hosting only \$3.95 per month" is displayed in blue. Further right is a green rectangular button with the white text "Get Started". On the far right of the banner is a small photograph of a smiling woman with long brown hair, wearing a denim jacket, looking towards the camera.

 The Best Web Hosting  
only \$3.95 per month [Get Started](#) 

# iPage Hosting

[iPage](#) was founded in 1998 which makes it one of the oldest companies who offer web hosting solutions. Today, there are more than 1 million websites that have been hosted on their platform. Currently, they have two data centers which are located in America.

## Prices and Plans:

[iPage](#) is among those shared web hosting companies who sell many types of hosting services but their focus is on shared hosting. This makes it very easy for the users to make a quick decision whether he/she is going to purchase the specific web hosting plan or not. You can purchase their 36-month plan at \$1.99 per month which makes them the cheapest web hosting company for new users.

Everything you need is included

 <p><b>Core features</b></p> <ul style="list-style-type: none"><li>Unlimited disk space</li><li>Scalable bandwidth</li><li>Unlimited domain names allowed</li><li>Unlimited MySQL databases</li></ul> <p><a href="#">See more details</a></p>	 <p><b>Designing and building tools</b></p> <ul style="list-style-type: none"><li>iPage Website Builder (6 pages)</li><li>Mobile optimized site builder</li><li>WordPress 1-click installer</li><li>Hundreds of templates and themes</li></ul> <p><a href="#">See more details</a></p>
 <p><b>Selling online</b></p> <ul style="list-style-type: none"><li>Free online store</li><li>PayPal integration</li><li>Easy 1-click installer</li><li>AgoraCart shopping cart</li></ul> <p><a href="#">See more details</a></p>	 <p><b>Sending and receiving email</b></p> <ul style="list-style-type: none"><li>Customizable email address with your domain (you@your-domain.com)</li><li>Check email online with WebMail</li><li>Email forwarding</li></ul> <p><a href="#">See more details</a></p>

## **Money Back Guarantee**

The company offers 30 days money back guarantee. Their policy regarding the refund is very simple. If the new customers do not like iPage web hosting within the first 30 days of the registration, then they can ask for the refund. The iPage offers 100% refund policy with no hidden fee. This time period will allow testing their services and making the final decision whether one is going to stay with iPage or not.

## **List of features**

Some of the features which you must know about iPage before purchasing a plan from them are:

- Free Domain Registration
- Free Website Transfer
- Free Site Builder with 1000+ templates
- Free SSL Certificates
- Free WordPress Building tools
- Unlimited and free email address
- Up to \$200 free advertising credit
- Advanced analytic tools
- 24 hour support and live chat
- 30 day money back guarantee

## **Backup options**

[iPage](#) does not offer any type of free backup in their hosting plans but they have the option to purchase the backup options. Their standard backup policy will make the backup of all sites once in a day while it could be upgraded to 5 times per day by paying a bit more extra.

## **Pros**

- Free Site Lock Security
- Cheapest shared Hosting
- Host unlimited websites and domains

## Cons

- No Free Backup Option
- No Reseller Hosting

## Conclusion

**iPage** is one of the cheapest hosting providers to start with but when you renew the price goes up. Their shared hosting plan starts with \$1.99/m and comes with unlimited storage, bandwidth, domain names and MySQL databases. They also throw in a free domain for one year, a simple drag and drop website builder and a 1-click installation for word press. If you register a free domain through ipage and wish to cancel your account, there is a non-refundable \$15 domain fee if you would like to keep your domain.

**[For More Information Please Visit Ipage Website](#)**

# Hostripples

In very short time, [HostRipples](#) has made its name in world best web hosting companies. Today, they have a total of 17 data centers in the different part of the world including India, USA, Canada, UK, Germany, Italy and many more countries. There are very limited reviews about HostRipples are available online because it has been still considered as a new web hosting company. That’s why I bring my review for you so you can get some help to decide that whether it is a reliable web hosting company for your business or not.

## Price and Plans:

[HostRipples](#) is one of those few web hosting companies who are offering all type of hosting solutions at one platform. Whether you are looking for shared Linux web hosting or VPN solution, you will found all of them with different price plans at HostRipples. The price details of their hosting plans are:

A screenshot of the Hostripples website's hosting plans section. The header reads 'Powerful Web Hosting Plans To Host Any Website'. Below the header are four categories: 'Shared Hosting', 'Reseller Hosting', 'Dedicated Server', and 'VPS Server', each with a dropdown arrow. Under each category, there are four plan cards. Each card has an icon, a title, a '50% OFF FREEDOM' badge, a crossed-out original price, and a new price. The plans are: SSD Hosting (\$3.00/mo to \$1.96/mo), Linux Hosting (\$2.00/mo to \$1.46/mo), Windows Hosting (\$4.00/mo to \$2.46/mo), and Business Hosting (\$12.00/mo to \$6.46/mo). A 'Live &gt;&gt;&gt;' button is visible at the bottom right of the plans section.

## Reseller Hosting Prices:

### Best SSD Reseller Pricing

## Hostriple Features:

- One-Click Installer for 431+ Apps
- 24×7 Customer Service
- Free domain included with each purchase
- Easy to use site builder
- Fast SSD Drives
- Advance cPanel with many options
- Free Website Migration
- Free SSL Certificates

## Backup Options:

While the company is already offering hosting plans at a very low price, but still they have not removed any feature from their list. They make backup of their all client's websites twice in a week while the restoration

services are also free. You can ask for the restoration in case if you lost a file or your website got infected by a virus.

### **Uptime:**

99.9% uptime is guaranteed by HostRipples. They do this by shifting web load from one server to other. They have dozens of data centers all around the world. This is an ideal opportunity for local businesses who want to host their website on the local server to make their website load fast.

### **Pros:**

- Very affordable business hosting
- Unlimited Disk space and bandwidth
- Datacentres in different countries
- Free Encrypt SSL included.
- CloudLinux , CloudFlare & Attracta SEO Tools

### **Cons:**

- Many options can confuse the newbie

### **Hostriple Review Summary:**

**Hostripples** is an affordable hosting solution for small businesses as well as individuals, especially those who are putting their sites online for the first time and want to save money without sacrificing any hosting features.

For More information, [Visit the official hostripples website.](#)

# SmarterASP

[SmarterASP](#) is an online web hosting service that established back in 1999 and since then have made a huge customer base on their service. They provide datacentre in both the US and Europe, so you can choose which best suits your needs.

They offer a free trial hosting but only available for widows based websites, so if you use windows servers, you can use their web hosting services for as long as two whole months without any credit card information, that is more than sufficient time to test their hosting. However, If you use cPanel on Linux servers, you can buy their shared hosting with unlimited disk space and many great features as low as \$2.95/month.

We've earned the trust of **421,335** customers as of today!

ASPNET BASIC	ADVANCE	ASPNET PREMIUM	AMAZING AFFILIATE PLAN
<b>\$2.95</b> a month	<b>\$4.95</b> a month	<b>\$7.95</b> a month	<b>FREE</b>

[SmarterASP](#) owns all of their equipment and hence are not in any kind of debt, which is one of the main reasons as to why their paid plans are so cheap, not that their hosting is of low quality or anything.

Package	Websites	Bandwidth	Storage	Price
W500	1	Unlimited	Unlimited	\$2.95
W1000	6	Unlimited	Unlimited	\$4.95
W1050	Unlimited	Unlimited	Unlimited	\$7.95

### **SmarterASP Features**

- Free Scripts
- Anti-Virus
- Anti-Spam
- Automatic Backups
- Cloud flare CDN
- 1-Click Installer
- Award Winning Support

### **Customer Support**

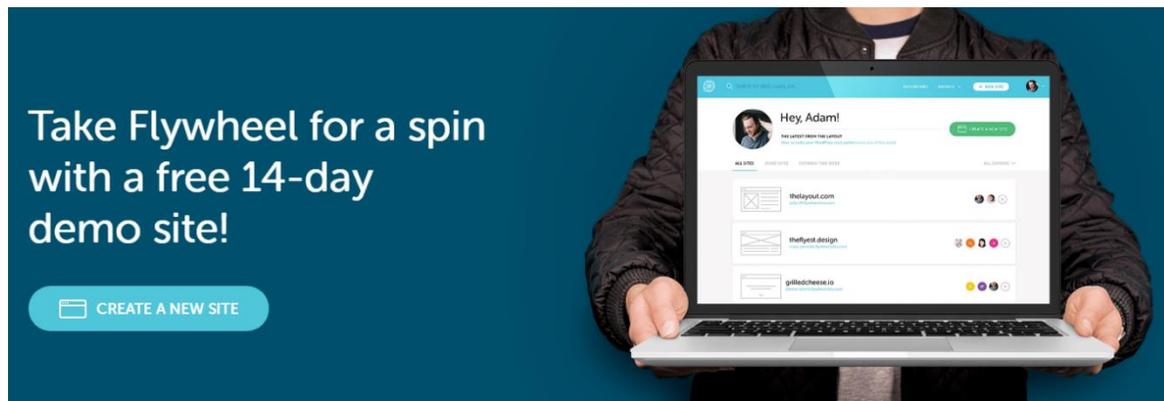

Like previously mentioned web hosting services, SmarterASP also provides a live chat feature on their website. Moreover, you can also submit a ticket if you have any queries, and they'll respond within a small period.

Visit [Smarterasp.net](http://Smarterasp.net) for more information.

- The offer all types of plans at affordable prices.
- A choice of Linux or windows servers
- Highly rated by thousands of users.
- Fixed renewal prices

## Customer Support

[Interserver](#) is one of the few hosting service providers that offer around-the-clock chat customer support with live representatives available 24/7. You can also submit a ticket if you have any queries, and they will try and respond as quickly as possible.

## Summary

[Interserver](#) is providing a single package that costs \$5 a month if you want to pay monthly and \$4 for a 3-year plan. However, using their discount code, you can enjoy the whole month of **VPS hosting** for just one cent!

Visit [Interserver](#) for more information

## **MilesWeb**

Established back in 2012, **MilesWeb** is a dynamic website that provides premium web hosting services on the internet, for some of the cheapest rates as compared to various other web hosting services.

[MilesWeb](#) provides a broad range of options when it comes to providing premium web hosting service that includes Dedicated servers, Shared hosting, Reseller hosting, Website security, Spam experts and more. Not only are their web hosting packages extremely cheap, but they also provide a whopping 30-day refund policy on their packages, so even if you're not fully satisfied with the services that they have to offer, you can get a refund by contacting their customer support.

Coming towards their packages, they provide 3 different locations for their hosting data center locations that include the USA, India, and the UK. The price of the packages vary in different data center locations, however, the cheapest packages are included in the USA packages.

**Economy**

## Pricing

As mentioned before, pricing varies from location to location. To compare the prices of different packages in different locations, you can check the following table:

Package	USA	UK	India
Economy	\$0.93 per month	\$1.29 per month	\$1.00per month
Value	\$2.12 per month	\$2.89 per month	\$2.99per month
Unlimited	\$3.57 per month	\$4.95 per month	\$5.00per month

Basic features are included in all three of the packages, regardless of the location of the data center. However, in high tier packages, higher packages are more superior than the economy packages.

## Features

Following are some of MilesWeb's features that they provide on their web hosting service.

- Free website migration
- Unlimited database
- Built-in Page caching
- Site Builder with 400+ templates
- Free SSL Encryption
- SSD servers
- Free.COM domain
- 60 Days Refund Policy

There are various features in which one package rules the other one out. Here is a comparison of the three packages listed on their site.

<b>Package</b>	Economy	Value	Unlimited
<b>Number of websites</b>	1	1	Unlimited
<b>Free Domain</b>	No	Lifetime	Lifetime
<b>Unlimited Bandwidth</b>	Yes	Yes	Yes
<b>Email Accounts</b>	10	Unlimited	Unlimited
<b>MySQL Databases</b>	3 DB's	Unlimited DB's	Unlimited DB's

## **Customer Support**

[MilesWeb](#) provides various options when it comes to solving their client's queries. These options include live chat, skype support, email support as well as a phone number.

If you have any queries regarding their services, you can contact their support through any means given.

For more information, you can visit their site at [www.milesweb.com](http://www.milesweb.com)

# DomainRacer

Among the top hosting sites in India, [DomainRacer](#) provides a great platform for website seekers to come, choose a domain for themselves and buy hosting for their website - all of this at some of the cheapest rates on the internet.

With hundreds of five-star testimonials from various users across different platforms, DomainRacer might be the perfect hosting site that you're looking for.

[DomainRacer](#) provides premium features on their hosting sites and is a fully managed hosting service. They also provide a free website creator, because according to them, not everyone is a web developer. This is a great initiative for those bloggers and business owners that want to get optimal service with additional features at the least possible cost, and that is what Domain Racer is providing.

## Pricing

With four different hosting packages to choose from, DomainRacer offers a range of package choices to fulfil the specific requirements of their users.

The price of their shared packages is as shown in the table:

BASIC For those 'Getting Started'	PERSONAL For Average Size Website	SILVER No.1 Business Choice	ADVANCED Heavy Traffic Website

## Customer Support

To solve your queries, you can use the "Call use" feature on their site to contact them to help with your problems. Moreover, you can also use the email to contact them and help with your queries at any time.

Visit [TMDHosting](https://www.tmdhosting.com)

## Conclusion and Recommendations

I have provided you with a review for some of the most reliable Web Hosting providers, but if you looking for a specific features, here are some recommendations:

- If you looking for the best technical support, go for **SiteGround**.
- If the speed is your main concern, use **A2hosting or SiteGround**
- If you want to pay one fixed price every time you renew your hosting, go for **hosrmetro or interserver**.
- If your website requires unlimited SSD storage and bandwidth signup with **GreenGeeks, interserver**
- If you are looking for the cheapest web hosting, go for **ipage, domainracer, or, hostinger .**
- If you are looking for best money back guarantee, go for **A2hosting or DreamHost**
- For business hosting use **InMotionHosting . nestify,**
- For Cloud Hosting, go for **Fastcomet, or Hostwinds. or cloudways**
- For Best Managed WordPress, use Getflywheel or Nestify
